

PRODUCT DESCRIPTION:

SOIL SEAL is a liquid concentrated binding additive that is applied to Hydromulch mixes to assist with binding the seed and mulch together and is also used as a soil sealer that can be applied to contaminated soil sites or for the application of erosion control. **SOIL SEAL** will reduce water useage and retain available moisture with only one (1) application, the benefits of **SOIL SEAL** will last until the establishment of plants & grass growth and slowing breaks down under normal environmental conditions over a period of time.

SOIL SEAL is fully biodegradable and offers you a sustainable user friendly solution with maximum results.

APPLICATION RATES:

SOIL SEAL is suitable for all Hydromulch mixes & Soil Sealing applications and while dosage rates may vary, we recommend the following application rates as a general guide also, **SOIL SEAL** needs to be diluted in water and mixed. Spray marking dye may also be added to the mixture to assist with monitoring application areas.

TREATMENT	APPLICATION RATE
Hydromulching	5-10 litres per 1,000 of tank mixture
Soil Sealing	10-15 litres per 1,000 sq'm

LIQUID SOIL BINDER

ACTIVE CONSTITUENT:
Anionic Polyacryamide
