

HYDRA-LIME

pH-SOIL SOLUTION

TECHNICAL GRADE LIQUID LIME

ACTIVE CONSTITUENT:
Calcium: 48% w/v

**ULTIMATE
INDUSTRIAL**

Ph: 1800 003 244

www.ultimateindustrial.com.au

PRODUCT DESCRIPTION:

HYDRA-LIME is a concentrated liquid suspension of Calcium Carbonate that is formulated to improve the soil pH of acid soils for re-vegetation and the treatment of Acid Sulphate Soils (ASS). **HYDRA-LIME** is much easier to handle and apply compared to other products, also minimising OH&S concerns. **HYDRA-LIME** provides more efficient and effective results due to a high concentration and a particle size of 5 micron, compared to Bulk Lime which has a particle size of 1,000 micron (1mm) and a solubility rate of 0.00015%.

HYDRA-LIME is suitable for all acid soils.

Research has proven, super fine lime particles dramatically increase the availability and the reactivity of the liming material.

APPLICATION RATES:

HYDRA-LIME dosage rates may vary, we recommend the following application rates as a general guide.

HYDRA-LIME dilute at 1 part product to 2 parts water as a minimum, keep agitating to prevent settling in the tank.

HYDRA-LIME should not be mixed or applied with any other chemical unless they are suitable to a very high pH solution.

SOIL pH RANGE	SAND-LOAM SOILS /1000SQ'M	CLAY BASED SOILS /1000SQ'M	PER CUBIC 'Mt/SOIL
<4.0	15-30 Litres	20-40 Litres	1000-2000 mL
4.0-5.0	10-20 Litres	15-30 Litres	750-1500 mL
5.0-6.0	5-10 Litres	10-20 Litres	500-1000 mL
6.0+	2.5-5.0 Litres	5-10 Litres	250-500 mL

PACK SIZES AVAILABLE (LITRES): 200, 800 Litres
