

PRODUCT DESCRIPTION:

HYDRA-LIME is a concentrated liquid suspension of Calcium Carbonate that is formulated to improve the soil pH of acid soils for re-vegetation and the treatment of Acid Sulphate Soils (ASS). **HYDRA-LIME** is much easier to handle and apply compared to other products, also minimising OH&S concerns. **HYDRA-LIME** provides more efficient and effective results due to a high concentration and a particle size of 5 micron, compared to Bulk Lime which has a particle size of 1,000 micron (1mm) and a solubility rate of 0.00015%.

HYDRA-LIME is suitable for all acid soils.

Research has proven, super fine lime particles dramatically increase the availability and the reactivity of the liming material.

APPLICATION RATES:

HYDRA-LIME dosage rates may vary, we recommend the following application rates as a general guide. **HYDRA-LIME** dilute at 1 part product to 2 parts water as a minimum, keep agitating to prevent settling in the tank.

HYDRA-LIME should not be mixed or applied with any other chemical unless they are suitable to a very high pH solution.

| SOIL pH RANGE | SAND-LOAM SOILS /1000SQ'M | CLAY BASED SOILS /1000SQ'M | PER CLUB 'MT/SOIL |
|---------------|---------------------------|----------------------------|-------------------|
| <4.0 | 15-30 Litres | 20-40 Litres | 1000-2000 mL |
| 4.0-5.0 | 10-20 Litres | 15-30 Litres | 750-1500 mL |
| 5.0-6.0 | 5-10 Litres | 10-20 Litres | 500-1000 mL |
| 6.0+ | 2.5-5.0 Litres | 5-10 Litres | 250-500 mL |
